

Rubber Hose Assemblies

HOSE 3103	Specification Reference: Similar to MIL-H-8794
Temperature Range:	-65 to +160°F (-54 to +71°C), Fuel -65 to +135°F (-54 to +57°C)
Reinforcement:	One fiber braid and one high tensile stainless steel wire braid
Inner Tube:	Seamless Synthetic Rubber Adhesive
Description:	High Pressure Fuel/Hydraulic Hose
Application:	Aircraft Hydraulic, pneumatic, coolant, fuel and oil systems. Impact resistant service for JP-3, JP-4 and JP-5 jet fuel.
Additional Info:	Used on the Boeing 747 for the fuel system. It is similar to 111 except it has stainless steel reinforcement.
